

Procurement Activity Plan

Financial Year 2025-26

The Building and Plumbing Commission (BPC) is Victoria's new regulator for the building and plumbing industries. It brings together three key functions:

- Regulatory services from the former Victorian Building Authority (VBA),
- Dispute resolution services from Domestic Building Dispute Resolution Victoria (DBDRV), and
- Domestic building insurance services previously managed by the Victorian Managed Insurance Authority (VMIA).

The Procurement Activity Plan provides potential suppliers of goods and services with an indication of sourcing activity to be competed in the market by the BPC during the financial year.

The BPC encourages innovative, effective, and outcome focused offers that demonstrate value for money to the Victorian public.
